

Definition: Use Text Properties, font Properties, Google Fonts, and custom fonts in Figma.

Solution:

Steps:

- First Open Figma in browser mode.
- Then create the new document **File** → **New Figma Design**.
- Set the background page color="#1E1E1E".
- Now add one frame using the Frame tool of width="300 px" and height="150 px" on your canvas.
- The frame inside the write a "ABCXYZ" using the text tool to center and text of color="#000000" text size="14 px" and font name="Digital Numbers".
- Write "Google" inside the frame using the text tool of color="#4384F7", "#EB4235", "#FDBB05", "#4289F7", "#34A852" and "#EB4438" text size="15 px" and font name="Balsamiq Sans".
- Write "Canon" inside the frame using the text tool of color="#000000" text size="15 px" and font name="Goldman".
- Write "Cadbury" inside the frame using the text tool of color="#3E2774" text size="15 px" and font name="Island Moments".
- Write "Amazon" inside the frame using the text tool of color="#000000" text size="15 px" and font name="MS reference sans serif".
- Write "X" inside the frame using the text tool of color="#000000" text size="15 px" and font name="Geostar".
- Now, Go to the **Export** button in the property panel. And **Export** it with .JPG/.PNG format.
